Professional Summary

Mobile Apps Developer with 3+ years of experience in designing and developing cross-platform mobile applications using Flutter. Specialized in creating responsive UI designs, implementing pixel-perfect interfaces, and integrating APIs for seamless user experiences. Proficient in Flutter framework and Dart programming with expertise in state management, performance optimization, and frontend architecture. Demonstrated success in delivering user-focused mobile applications with clean, maintainable code.

Technical Skills

- Languages: Dart, Python
- Framework: Flutter
- State Management: GetX, Provider, Riverpod, Bloc
- UI - Figma, Adobe XD
- Testing: Integration Test, Widget Test, Unit Test
- Database – Sqflite, Shared preferences, Hive, Firebase Firestore, MySQL.
- Working Experience in sqflite, Push Notification, Audio Player, Firebase, REST APIs, WebSockets, GCP, QR scanner and CI/CD.
- Version Control: Git, GitHub
- AI & Developer Tools: ChatGPT, Claude, Cursor AI
- PM tools: Trello, Discord

Experience

Total Experience: 3+ Years

Mobile Application Developer (Flutter)

Codixel
Location: Mohammadpur, Dhaka 1207
Duration: August 2023 – Present

Key Responsibilities:

- Design and develop responsive mobile application interfaces using Flutter framework
- Convert UI/UX designs from Figma and Adobe XD into pixel-perfect mobile applications
- Integrate REST APIs and WebSocket connections for dynamic content and real-time features
- Implement state management solutions (GetX, Provider, Riverpod, BLoC) for optimal performance
- Conduct comprehensive testing including unit, widget, and integration testing
- Collaborate with backend developers and designers to ensure seamless user experience
- Optimize frontend performance and ensure responsive design across different screen sizes

Key Achievements:

- Successfully deployed multiple applications on Google Play Store and Apple App Store
- Implemented advanced features including chatbot, audio streaming, online exam and in-app purchases, sslcommerz, bkash payment
- Maintained 99%+ crash-free user sessions across deployed applications
- Progressed from intern to full-time developer within 3 months

Project Experience

EarningsCall: Company Earnings Call Player

Project Overview: This application is live on Play Store and App Store.
Earnings call is where public companies give a confidential look at their performance and expectations for the future. Investors and brokers listen to earning calls while doing stock research or doing stock analysis of a specific company. Our extensive database of earnings calls allows anyone to search for publicly traded companies and listen to the latest quarterly earnings calls.

- Recreated designs from Figma and Adobe XD to ensure accurate UI implementation.
- Integrated RESTful APIs for seamless data exchange between client and server.
- Implemented a chatbot with webSockets for enhanced user interaction and support.
- Developed and integrated an audio player with transcript functionality for a richer user experience.
- Managed in-app purchases to enable seamless monetization.
- Integrated Firebase Remote Config and A/B Testing and Google Cloud Logging for dynamic app updates and feature experimentation.
- Oversaw the Play Store app release process, ensuring compliance and smooth deployment.

Technology: Flutter, Dart, GetX, Firebase, Rest API, Push Notification, GCP
Project Link: PlyStore || AppStore

LawEntra: Legal Exam Preparation Platform

Project Overview: Feature-rich legal exam preparation app, published on the Play Store, offering MCQ-based exams, course package management, secure payment integration, and detailed performance analytics for law students and professionals.

- Developed authentication, schedules, assignments, and exam practice modules with responsive UI.
- Integrated RESTful APIs and Firebase for authentication, real-time sync, and push notifications.
- Built package management with bKash payment integration and secure content unlocking.

Technology: Flutter, Dart, Provider, Bkash Payment, Firebase, REST API
Project Link: PlayStore || AppStore || Microsoft Store

MCQEntra: Government Job Exam Preparation Platform

Project Overview: Feature-rich Flutter application for Bangladeshi government job exam preparation (BCS, Bank, NTRCA, Primary Teacher, Railway), offering timed MCQ mock exams, subject-wise free practice, paid course packages with in-app payment, and detailed performance analytics with leaderboards. Bengali-first, clean-architecture app for Android and iOS.

- Built a complete exam engine with timed MCQs, model/live tests, question bank, and custom exam generation.
- Integrated bKash payment gateway with token, agreement, direct-pay, coupon validation, and package unlock.
- Developed performance analytics including exam analysis, subject-wise accuracy, rankings, and leaderboards.

Technologies: : Flutter, Dart, Provider, Clean Architecture, bKash Payment Gateway, Firebase , REST API, Bengali localization
Project Link: PlayStore || AppStore

Training

Mobile Application Development

Institution: Basis SEIP Training (BITM) (January 2023 – April 2023)

Education

BSc in Software Engineering (Major in Data Science**)**
Institution: Daffodil International University
Passing Year: July 2023
CGPA: 3.87
